

Product nameJLM1561-1602

Appearance

Specification

|                        |                                                    |
|------------------------|----------------------------------------------------|
| Product specifications | Forwarder                                          |
| Applicable scope       | GPS L1(1575MHZ),BD2 B2(1561MHZ) , GLONASS(1602MHZ) |
| Bandwidth              | 10MHZ                                              |
| The scope of work      | Straight line distance>15M ( No cover )            |
| Cable length           | 25M                                                |
| RF connector           | TNC                                                |
| RF cable impedance     | 50Ω ( RG-58 )                                      |
| Operating Voltage      | 220±10% communicate with                           |
| Working current        | < 100mA                                            |
| Operating temperature  | Host: -20℃~ + 60℃ ; Antenna : -40℃~ + 85℃          |
| Humidity               | < 95℃                                              |
| Dimension              | 99mm ( Radius ) ×65mm ( Height )                   |

Dimension (mm)
